

Matting for Golf and Sports Clubs

New golf clubs are being built; old ones, like many sports clubs, are being refurbished. Sports halls and new facilities are important in the UK Government's school initiative. All these buildings need to be clean, hygienic and safe.

ENTRANCES

High performance entrance flooring systems will keep out dirt, clean shoes effectively and reduce maintenance costs.

- 1. Frontrunner Plus protects the foyer of the new Surrey Downs Golf Club.
- 2. Frontrunner Plus matting, at Ticehurst's Dale Hill Hotel and leisure complex, has been laid within the revolving door and alongside the disabled access.

CHANGING ROOMS

Slip resistant matting is widely used where water may be a problem and there is a need to maintain safe and hygienic conditions. Changing rooms can be crowded and the floor wet from showers, jacuzzis or swimming pools. Matting incorporating sanitized anti-bacterial and anti-fungal additives ensures permanent hygiene and protection for bare feet.

- 3. Heronrib in the changing rooms and shower areas of Hong Kong's Vianni Cove clubhouse.
- **4.** Herontile is a new press click square tile system which complements roll format Heronrib.

BAR AND KITCHENS

Slip resistance is important in wet and potentially slippery areas, such as behind bars, in serveries and kitchens.

5. Floorline provides comfort and slip resistance in this club bar area.

SWIMMING POOLS AND SAUNAS

Swimming pool surrounds can be a hazard when wet. The solution is slip resistant matting with a hygienic surface. For external pools, the matting can be left out permanently or can be quickly laid as weather and use dictate.

- **6.** This indoor pool has Heronrib slip resistant surrounds and walkways into the changing rooms.
- 7. Heronrib in the sauna area at the Hyatt Hotel Azerbaijan.

OTHER APPLICATIONS

Mattings are available for very specific purposes, such as to relieve standing fatigue or to form floorcoverings.

- 8. Herontred is a vulcanised rubber tile used to form wall to wall floorcovering for exercise rooms or childrens' play areas
- **9.** Anti-fatigue matting will reduce standing fatigue at reception desks or counters.
- **10.** Flexitred with a very hard wearing surface for the protection of high quality wood and other floors.
